# AT&T Passport for Windows 95 Quick Install Guide

*Version 2 Release 1*

With AT&T Passport for Windows 95\*, you can attach your Windows computer to the AT&T global network to provide 3270 emulation. This reference card gives you information on how to install, set up, and start the program. For information on how to use the program, refer to the Passport Help function.

## Useful data

You may find it useful to have the following data available when you start installing the program:

### **Customer:**

Account number \_\_\_\_\_

User ID \_\_\_\_\_

### **Installation:**

Path \_\_\_\_\_

### **Support:**

Name \_\_\_\_\_

Phone number \_\_\_\_\_

When you have a problem with AT&T Passport, contact your supporting company at the phone number listed above.

## Installing AT&T Passport

To install AT&T Passport:

1. Insert the installation diskette into your diskette drive.
2. Click **Start** on the Menu Bar, and then select **Run**.
3. Type **a:\setup** in the dialog box and click **OK**.

### **Trademarks**

- Microsoft, Windows, and the Windows 95 logo are trademarks or registered trademarks of Microsoft Corporation.

## Setting up AT&T Passport

To prepare AT&T Passport for use, you must set up the program with the **General Setup**, **Connection Setup**, **Modem Setup**, and **Session Setup** options on the **Setup** menu. Both traveling users and non-traveling users, and both asynchronous dial and TCP/IP users need to make these selections.

To set up AT&T Passport:

1. In the **General Setup** window, select the defaults for a basic configuration.
2. In the **Connection Setup** window, make the following selections:
  - a. Type in or select from the list in the **Country Selection** area the country you are presently in (**Present Country**) and the country you are connecting through (**Gateway Country**).
  - b. Type in or select from the list in the **Gateway Selection** area the **Primary Phone** (or **Primary Server** for TCP/IP users) and the **Backup Phone** (or **Backup Server**) that you want to use in the gateway country.
3. In the **Modem Setup** window, type information or make selections for your modem manufacturer, modem type, dial speed, and serial port.
4. In the **Session Setup** window, type the title that you want for your Session A. Scroll through the list of countries and click the **Account Country** (where your account ID is defined). Then, type your account ID, user ID, and network password. Scroll through the list of countries and click the **Language Country** of your choice (usually the home country where your account ID is defined). You can set up as many as four sessions.

## Starting AT&T Passport

To start AT&T Passport:

- Double-click on either the **Use Passport (Async)** or the **Use Passport (TCP/IP)** icon. The program displays the About Passport window with the following push buttons:

### Getting Started

Information to help you start using AT&T Passport
